

STIMULATE INNOVATION

INNOVATIVE EBUSINESS

Innovation is not only a way to stay ahead of competitors, it's also a way to automate and harmonize your processes, improve user interaction and to **properly act on changing business drivers & markets**. We advise and implement the appropriate solutions matching **technology** and functionality with your business needs !

We are process specialists

Thanks to the combination of our strong knowledge on the SAP business processes (finance & logistics) with in-depth technological skills we are capable of helping our customers to optimize their processes in many ways. We operate cross-industry and have many references in retail, pharma, automotive, consumer goods and many more...

We love technology

Our people are technical experts to make your SAP environment evolve : developments, interfaces, connectivity and multi-channel access. They follow the latest trends and evolutions, aiming for the best fit between technology and your business requirements.

PROCESS INTEGRATION

- Integrated flows between your applications, devices and partners
- Process automation with workflow
- Master data synchronization
- End-to-end process monitoring and issue tracking

CONNECTIVITY & INTERFACES

- Interfacing your SAP solutions with third-party applications
- Synchronous & asynchronous communication
- Implementation of industry standards for EDI, XML & SWIFT
- Linking your business to in-the-cloud solutions

WEB & PORTAL

- Development of state-of-the-art web applications (B2B/B2C)
- Deployment of SAP Portal and integration into MS Sharepoint
- Ergonomic user screens, cockpits and web-based reporting
- Security and single-sign-on solutions

MOBILE

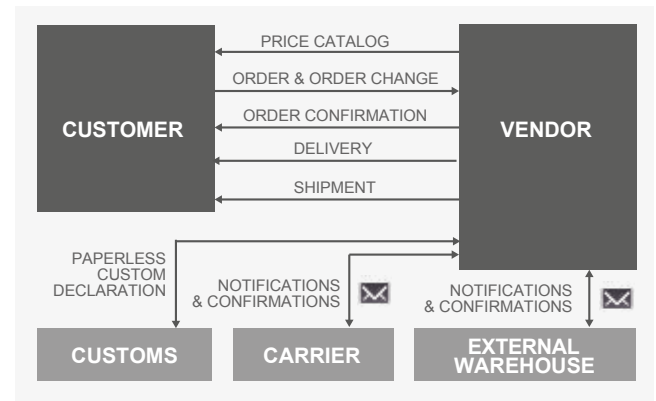

- Online & offline mobile applications
- iOS & Android apps for mobile phones and tablets
- Mobile reporting and dashboards
- Barcode scanning and online approval

SCENARIO 1

logistic processes

Automation of logistic related messages from order handling to delivery and shipment via SAP Process Integration. This allows to speed up information exchange with customers, suppliers, carriers, external warehouses and industry market places to improve replenishment & data accuracy and to reduce operational costs.

- Classic EDI including JIT & retail scenarios
- Warehouse automation with picking robots
- Web & mobile apps for order handling
- Development and consumption of web services
- Master data synchronization and bank-end connectivity
- End-to-end monitoring

SCENARIO 2

e-invoicing and e-billing

The issuing and handling of invoices can be a complex process. We offer various tools and solutions in this area ranging from invoice scanning, electronic invoice exchange and visualization of invoices in a customer/partner portal.

- Electronic invoice exchange via EDI & mail
- SAP Vendor Invoice Management
- Legal archiving & dematerialization
- Invoice scanning and document linking in SAP ERP
- Digital signature and approval workflows
- Integration with in-the-cloud solutions
- Intercompany billing

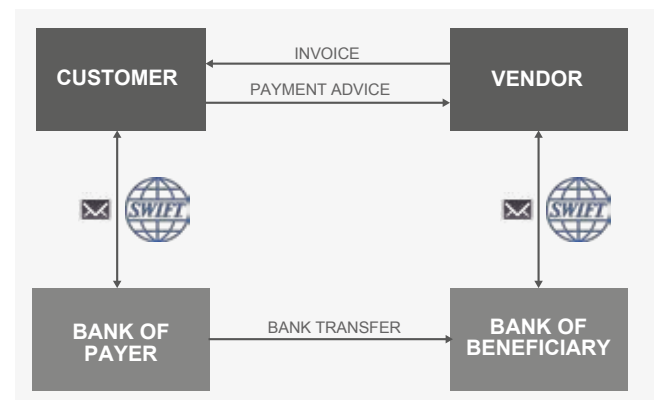

SCENARIO 3

bank connectivity

Straight-through and secure process integration with banks via Isabel, Fides, SWIFT, ... using SEPA and other formats : bank statements, payments, payment advices and bank confirmations. We deliver worldwide implementations for your subsidiaries in close collaboration with service bureaus, SWIFT and international or local banks

- SAP Bank Communication Management (BCM)
- SAP SWIFT Integration Package
- Swift Alliance Lite / SAP Financial Services Network (FSN)
- Confirmation matching system
- End-to-end security and encryption
- eTreasury platform for subsidiaries

SOLUTION OFFERING
