You will join our intelligence as a **SAP Analytics consultant** and will work on challenging projects for outperforming customers.

Function description

You will be involved in one or more areas of an analytics project and grow into an expert in data-warehousing, reporting solutions, in-memory computing or mobile analytics. Your job is to :

- Identify, analyse and define the customers reporting strategy and functional requirements
- Provide specialist expertise in one or more areas of analytics : data extraction, loading & modeling, business planning & simulation, balanced scorecarding, corporate dashboards, mobile reporting or in-memory computing.
- Translate requirements into SAP BI functionality & metrics and identify possible gaps
- Solution design & implementation, go-live & support
- Plan & manage BI (sub)projects at major European companies & strategic customers
- Develop successful business and customer relationships and participate in pre-sales, account management & BI advisory programs

Your profile

You have 3 to 5 years hands-on experience with the SAP BW, BusinessObjects solutions and reporting tools.

You are an energetic person with good attention to detail, enjoying to work independently and in a team, ready to deal with technical, functional and people issues.

- Topics such as ETL, KPI's and metrics, in-memory computing, dashboard design, are well-known and you have a solid expertise in one of the above domains.
- SAP experience in one or more functional modules is a plus
- Proven ability to perform in a dynamic environment, where quality and flexibility are critical
- Ability to create and maintain contact and trust with the customer
- Solid presentation & communication skills to senior management and CxO-level
- Ability to overcome internal barriers through drive, determination & empathy
- Resistance to challenging environments and demanding timeframes/deadlines
- Strong interpersonal skills showing great enthusiasm and social empathism
- You speak and write English fluently. good notions of French and/or Dutch are an asset
- Optional : you are willing to travel abroad (Luxembourg, Belgium, France & Switzerland)

Our offering

This position offers you the opportunity to become an expert in one of the many domains SAP analytics has to offer : good candidates will quickly progress to fulfill both project management and participate in pre-sales activities. You will get a unique opportunity to work with the latest analytic solutions.

Our company culture is rather challenging yet very down to earth and transparent, which is reflected in our motto : **we do SAP, we deliver and we are recognised**. You will have to focus, work together as a team, take the lead as from day one... But you will get a lot in return : an excellent remuneration package, operate cross-industry, meet inspiring people, exchange experience and knowledge on our renowned corporate events - where fun, adrenaline & excitement are only a few keywords, and so much more!
