

INTENSUM WINS SAP COLLABORATION AWARD FOR ITS PRODUCT AND SERVICE LEADERSHIP IN BUSINESS INTELLIGENCE AND PERFORMANCE MANAGEMENT

Brussels, 11 January 2010, 4.30 pm

On the December 17th 2009, Intensum received a SAP collaboration award during the annual SAP Belgium & Luxembourg Award ceremony. Different criteria had to be met in order to receive this award. The common denominator in last group of SAP Collaboration Award winners was their solution or business process excellence in SAP strategic solution areas, like solutions for the Business User, CFO, CIO, and such.

Jan Steukers, COO SAP Belgium & Luxembourg, praised our efforts in the domain of Business Objects & Business Warehouse and the strong collaboration between Intensum and SAP.

“Implementing Business Objects on top of SAP Business Intelligence”. This is the title of the number 1 demo during the past SAP User Day. More than 13 customers have taken a private appointment to learn about this business topic and the partner’s experience. Only 2 weeks later, customer interest has been confirmed in their Best Practices workshop at the SAP Lounge.

As you understand, Intensum stands for more than excellence in finance solutions. This award is certainly a strong motivator to further demonstrate product and service leadership in Business Intelligence and Performance Management solution”

Intensum is very proud with this award as it demonstrates that we are so much more than just an expert in Treasury and Financial Supply Chain. Our strategy to combine finance & treasury solutions, together with Business Intelligence & Performance Management solutions and to innovate & integrate via SAP Netweaver is a success factor for both our company and our customers. This award is a strong motivator to keep investing in functional & technical leadership in our domains.

In this respect we would also like to thank SAP and our customers for their collaboration, and our consultants for their passion and great effort !

Intensum is a European SAP consulting agency. We deliver business skills, project management and first-class SAP implementation competencies, focusing on Financial Supply Chain Management (SAP FSCM / Treasury & Finance), Business Intelligence (SAP Business Warehouse, Business Objects and Planning) and process improvement through innovative solutions (SAP NetWeaver & Solution Manager) and SAP ERP.
